About Zeobond Pty. Ltd.

Zeobond Pty. Ltd. is the world leader in developing and commercializing geopolymer technology, marketed as E-Crete, an alternative to Ordinary Portland Cement (OPC) utilising 100% recycled waste (fly ash and slag) and produces 80% less CO₂. Zeobond works with waste producers and the global construction industry to produce E-Crete concrete products. Zeobond built and operates the world's first geopolymer concrete batching plant, and produces E-Crete for the local Australian market with several additional plants coming online in Asia and North America later in 2008. E-Crete can be used in all applications where concrete is used today. Initial customers include local council, road infrastructure projects and private users.
